PROFILE

Full-stack developer with over three years of experience building web and mobile products. I currently lead both frontend and backend development on a SaaS campaign platform, and I take on freelance work through Upwork, where I handle projects from first call to delivery: understanding what the client actually needs, agreeing on a plan, and shipping it on time. Most of what I build sits between product and engineering, and I like being the person who turns a rough idea into something that works. Alongside my engineering work I am finishing a degree in comparative Islamic law, which trained me to weigh opposing arguments carefully before settling on an answer. I still rely on that when making technical decisions. I am now focused on going deeper into native iOS development and design-led product work.

EXPERIENCE

Full-Stack Developer (Remote) · DM Champ

May 2024 – Present

SaaS platform for business campaign management and AI-assisted customer engagement

- Lead frontend development across three surfaces: Flutter & React for web, and Electron for the desktop app, so the product ships to every platform from a small codebase.
- Build and maintain the backend with Node.js, TypeScript, Supabase, and Firebase Cloud Functions, covering authentication, REST APIs, and the data model.
- Shipped the AI side of the product: a chatbot that handles customer conversations, AI-assisted campaign creation, and automated appointment scheduling and booking.
- Work directly with the founders to scope features and settle on an approach. It is a small team, so I own most of what I build from design through to production.

Full-Stack Developer, Project-Based Virtual Internship · BTPN Syariah × Rakamin Academy

May – Jun 2024

Selected internship program with an Indonesian sharia digital bank

- Built a full-stack application with a Vue.js frontend, a Go backend, and PostgreSQL for data.
- Delivered to a fixed timeline and review process set by the bank, working in a fintech context.

EDUCATION

UIN Syarif Hidayatullah Jakarta · B.A., Comparative Schools of Islamic Law

2020 – Present

SKILLS & TOOLS

Languages TypeScript, JavaScript, Dart, Go, Swift, SQL

Mobile Flutter, FlutterFlow, React Native (Expo), Swift, SwiftUI, Xcode

Web React.js, Next.js, Astro, Vue.js, Electron

Backend & Data Node.js, Go Fiber, Supabase, Firebase, Cloud Function, REST API design, PostgreSQL, MySQL, MongoDB, Redis

AI & Automation OpenAI API, Anthropic API, MCP servers, n8n, Claude Code

Infrastructure Docker, Google Cloud Platform, Firebase, Vercel, Cloudflare, CI/CD

Spoken Indonesian (native), English (intermediate)
